

Supporting young people to COMMUNICATE, COLLABORATE and CONNECT through team LEGO® building

Run by experienced Speech Pathologists, Construction Club is more than building bricks—it's about learning communication skills, boosting confidence, and developing essential social skills in a supportive and inclusive environment.

For children and teens aged 4–18 who may need support with:

- social communication e.g. negotiation, perspective-taking, sharing
- language development (e.g. following instructions, formulating sentences, increasing vocabulary)
- building friendships with like-minded peers
 - self-advocacy and confidence

or scan the QR code for more information or to register for the term based (8 weeks) & school holiday (4 consecutive days) clubs.

Research shows children who attend at least three months of LEGO® based therapy have improvements in emotional wellbeing, communication and social skills.

HOW DOES IT WORK?

After an individual assessment session , each child is carefully matched into a group of 2-4 young people, facilitated by a Speech Pathologist.

The program starts with structured role-based team building, and progresses into developing high level language and collaboration skills alongside exciting and more complex LEGO® creations.

Kids come for the LEGO®... but stay for the connections!

ADDITIONAL BENEFITS

- building fine motor skills - embracing communication differences - sensory & visual supports - parent support & community

WHO ARE WE?

Helen Eldershaw and Bec Taylor are two passionate Speech Pathologists with 20 years experience between them, including extensive training in LEGO®-based therapy. They strongly support the neuro-diversity affirming movement, and believe using strength-based learning with real-time peers is an extremely effective and cost-efficient therapy approach.
